

# Diamond Crystal® Jiffy Melt® Ice Melter

## Faster Melting Starts Here®

Jiffy Melt® ice melter contains a specially formulated blend of Magnesium and Sodium Chlorides for quick-start action.

- Works down to -10°F/-23°C
- More cost-effective than straight magnesium and calcium chlorides and melts at lower temperatures than sodium chloride (rock salt).
- Available in 20 and 40 lb. bags and 12 lb. jugs.

### Directions for Use:

Remove slush and as much loose snow as possible before ice melter application. Spread Jiffy Melt® ice melter evenly across surface area. Apply ½–1½ cups per square yard, depending on ice thickness and air temperature, as needed. Reapply as necessary. When ice and snow soften, remove slush and any excess ice melter from pavement for good concrete maintenance.

\* All specifications are approximate. Please contact your broker or Cargill representative for exact specifications. Package dimensions are for filled area of packaging and do not include the flat handle portion of the bags.

## Technical Information

### Description

This product is intended for use as an ice and snow removal agent and is a two component blend formulated to melt ice and snow faster than rock salt.

### Chemical Analysis

Component	CAS Number	Units	Typical
Sodium Chloride (dry)	7647-14-5	%	90.0
Magnesium Chloride Hexahydrate	7791-18-6	%	10.0

### Methods of Analysis

Methods of analysis are based on ASTM E 534, SHRP H-205, Ice Melting Capacity Test and Cargill internal methods.

### Producing Locations

This product is packaged for Cargill Salt using salt sourced from Cargill Salt - Cleveland, Ohio.

### Storage information

- Diamond Crystal® Jiffy Melt® ice melter contains magnesium chloride, which is hygroscopic, thus easily pulls moisture from the air.
- Close and reseal container tightly to keep product dry, or place in a moisture-proof container
- Store in a dry place
- Always store ice melters out of reach of children and pets
